

Suggested Street Trees

(for planting between sidewalk and curb or "planting strip")

Trees must be: 2" – 2½" in diameter (caliper)
High branched
Nursery grown, Quality A grade, and free of disease and insects
Balled and burlapped (B&B) using natural fiber rope and burlap
Newly planted trees must be watered deeply for the first 2 years
"Gator bags" may be used during the summer months

Smaller Trees – for locations under the utility wires
