

FLOOR PLAN

BOARDWALK PAVILION CONCEPT

VIEW FACING SILVER LAKE

IDEAS:

1. FLUID SHAPES OF ROOF AND WALLS ARE MOST RESILIENT IN STORMS.
2. SOLAR ROOF (BUILDING INTEGRATED PHOTOVOLTAIC - BIPV) - A BUILDING THAT PAYS ITS OWN ELECTRIC BILL!
3. FLUID FORMS CELEBRATE THE TRADITION OF MARITIME DESIGN AND JERSEY SHORE EXUBERANCE
4. DETERMINE THE REQUIRED SIZE AND BUDGET OF THE BUILDING BEFORE BEGINNING ACTUAL DESIGN.
5. OUTDOOR AREAS UNDER ROOF CAN BE ENCLOSED OR LEFT OPEN TO PROVIDE MUCH NEEDED SHADE DURING THE SUMMER. (AND DON'T FORGET THE ROCKING CHAIRS!)
6. IF ADOPTED, THIS CONCEPT CAN BE APPLIED TO ALL FUTURE PAVILIONS (THEME AND VARIATIONS AS REQUIRED)
7. WALLS AND ROOF CAN BE PRE-FABRICATED OR SITE BUILT.
8. DESIGN STATEMENT: BELMAR LOOKS FORWARD TO THE FUTURE!

RESPECTFULLY SUBMITTED,

TIM MCCORRY AIA, LEED, 417-12TH AVENUE, BELMAR, NJ 07719, 732-962-3328, TIMMCCORRY@GMAIL.COM, 8/29/14
